EDUCATION

B.TECH(COMPUTER SCIENCE)
Kalinga University

06/2022

Higher Secondary Education (12th Grade): (CBSE)
Sachdeva International School

05/2018

SKILLS

Web Development: MERN Stack

Data Structures and Algorithms - 250+ Que

Programming Languages: C++, JavaScript

Database Systems: MySQL, MongoDB

Software Development Lifecycle (SDLC), Object-Oriented Programming (OOP) principles

Scripting and Automation

Strong problem-solving and analytical skills

Version Control: Git and GitHub

Operating Systems: Strong hands-on with Linux

PERSONAL PROJECTS

ARC-Ecommerce
- Developed a dynamic full-stack e-commerce platform inspired by the Arcane series, seamlessly blending HTML, CSS, and JavaScript on the front-end, while harnessing the power of NodeJS on the back- end to ensure efficient functionality. The application will store and manage data using MySQL, creating a captivating online shopping experience reminiscent of the arcane world.

ElectionVoteDapp
- Developed a decentralized election voting DApp leveraging NPM, Truffle, Ganache, and MetaMask, built on Solidity for smart contract logic and powered by Web3. Empower secure and transparent voting processes, ensuring the integrity of elections through blockchain technology.
